

Memorandum to the Secretary- General of the United Nations

HE Mr. Ban Ki - Mon - New York
To the Committee on Human Rights - Geneva

Friendly Greeting;

The foundation of the World Organization of the United Nations was great pleasure for all world for its contents of the universal principles to preserve humanity and lofty goals for the services and maintaining high values of principles to serve humanity all over the world.

Its of great appreciation for those principles to be followed by legislation, assets, rules with proper measures to be controled with inspection and following up all the advices, and to emphasize the commitment of Member States to observe the application of these principles established by the World Organization, departments, sub- associations and internationalism, with institutions synonymous to support the activities of the organization and its subsidiaries for following-up all the functions and activities in all parts of the world between all States.

Whereas the rights and safety of life and ensuring the freedom and the maintenance of dignity is the primary goal, which is built upon the principles

The UN in New York and all its branches located in five continents to develop legal controls binding on states and governments of countries that have accepted the United Nations and its subsidiaries sergeant universally practices and achieved such controls gradually with global developments and the requirements of the urgent necessity to preserve the life and rights of human beings.

One of the most suffering of human being are wars and the use of lethal weapons of mass destruction without scruples or deterrent what might impact and effect on the rights and an environment and devastating at the time of all that surrounding environment that may convey to new generation of human being. One of these deadly weapons with lethal consequences are anti - personnel mines and anti-vehicles mines.

His Excellency the General Secretary of the United Nations

The Republic of Turkey is the only country in the world that implanted the mines in its territory about 800 (eight hundred) miles along the southern borders with a width ranging between 200-300 meters

Turkey has signed with other countries the Ottawa Convention on the prohibition of the use of chemical weapons, toxic gases and also not to use anti - personnel mines and remove them from their locations and get rid of their stocks(OTTAWA CONVENTION)

This agreement, signed by 161 countries, including the Republic of Turkey committed to to remove them but not implemented till this date, not taking any serious step towards the implementation of this commitment.

Sequnces of governments have been implanted on governance in the Turkish Republic of these anti-personnel mines and vehicles on the fertile land originally which actually owned by the residents of nearby villages and towns of the international border with the Syrian Arabic Republic.

Based on the modern media sources and document viewing , among them , for example : the newspaper (Neue Züricher Zeitung) , the Swiss Zeitung , published in the issue dated the second of the month of November 2013

(Neue Züricher Zeitung)

(Frankfurter Rundschau)

Also the newspaper(Frankfurter Rundschau) German correspondent ;

Gerd Höhler

Also the newspaper

(Deutsch-Türkische Nachrichten Zeitung)

It confirms that the government in Turkey so far not taken any practical action to remove these mines in these lands which is against the basic principles of the Ottawa Convention , which stipulates that the signatory States is committed , to :

First: the mine located on the territory should be removed within a maximum period of 10 (ten) years from the date of issuing of this agreement , which began in the first of the month of March 1999

Second : the disposal and destruction of all mines located in its stores and warehouses during a maximum period of 4 (four) years.

Third : cleaning and reconstruction and rehabilitation of land contaminated as a result of mine planted within a maximum period of 4 (four) years.

The legal limit time set by the Ottawa Convention of the Turkish Republic will end in /March 2014 .

The intention of the Turkish government of removing these mines sometimes relating to the armed forces and on the other hand they refer the subject for discussion and deliberation with some private companies, and to respond to correspondence and its committees emanating from the Ottawa Convention to monitor the commitment of the signatory States to the principle of the times that it lost with the passage of time maps Engineering minefields , and another excuse is the maps of minefields become so old and useless because of what might be landmines have been displaced from their planted places , if all of these arguments emphasizes the lack of credibility of the Turkish government commitment to remove those mines which claimed the lives of thousands of the civilian population and has thousands of citizens of the southern border areas to their extremities and legs ,losing their eyesight and have been subjected to distortion and became disabled.

In recent months Turkish government has ordred all the, residents of the southern border areas with Syria not to invest any agricultural activity in these lands and the will not take any responsibility of that people who commit that and become a victim of that mines and the Turkish authorities will give no any copensation to any one who will be injured regarding financial affairs or charging any physical disabilities.

The Turkish government has opened the door to the residents in those areas to work on their own risk and adventure to their lives and their presence in the deadly minefields that they are only be responsible if the dye or become disabled..

We had been so exited when the human ability consensus humanitarian creative to compel the Government of the Syrian Arab Republic for the destruction of chemical weapons , based on the legal argument that Syria is one of the countries that have signed the Ottawa Convention and therefore committed under the signature of the terms and conditions of this Agreement which requires

forbidding of use of chemical weapons and poison gas , but they must get rid of these weapons and materials in warehouses

All the world welcome when we got rid of them with thanks to global solidarity and determination to compel the government Syrian Arab implementation of the decisions of the Ottawa Convention and remove the dangers arising from such deadly weapons which can not differentiate between unarmed armed people, women and old ages which is against principles of fundamental human rights.

We call on Your Excellency in your capacity as General Secretary- of the United Nations, so eagerly to implement the principles and legal provisions of the Ottawa Convention to get rid of mines and to be removed, and all members of the Ottawa Convention and the International Commission for Human Rights in Geneva to address the Government of the Republic of Turkey for the implementation of the signed and commitments made in Ottawa under immediate practical plan and a specific period of time under the supervision of a divine emanating from the Ottawa Convention and the obligation of the Turkish Republic on the following:

- 1 -To remove all mines that located along the southern border with the Syrian Arab Republic during the period of time not more than five years.
- 2 – To clean the lands and fields that were located where mines , and qualify to become free of any pollution or damage to human beings and organisms .
- 3 - To compensate all those affected as a victim of mines in those areas and to compensate families of orphans , widows and the owners of the Impairments , deformation as a result of mine explosion and pollution of the environment .
- 4 – Reorganize the ownership, residents and citizens of those border areas of land to reconstruct them to be eligible for life , agriculture and cattle breeding.
- 5 - Rechecking inside the warehouses of the Turkish Republic to get rid of stockpiled mines and to supervise the immediate completion of the implementation during a maximum period not more than 4 (four) years
- 6 - Obliging the Government of the Republic of Turkey to sign the Action Plan mentioned above and documenting this undertaking and publishing assets as a document of the Ottawa Convention to disposal and demining as well as a copy deposited with the Secretary General of the United Nations with the financial punishment for each specified period of time delayed where all implementation of the program as stipulated in the Ottawa Convention on mine removal and disposal of mine which has been issued previously..

His Excellency the General Secretary

The safety and the dignity of all human being are responsibility of all individual all over the world regardless the colour and,religion of all people

The World Organization of the United Nations created to be a guarantee to do all the requirements of this holy work of governing the relations of states and nations , including sanctioned by deducing law and humanitarian principles that respect the entity rights, his life, liberty, and dignity

We are confident of your interest in the application of universal principles of the United Nations, and convinced your keenness on the integrity and dignity of the human , hoping to take the content of our note this into consideration .

Yours,

Ibrahim Schatlo
